Premium Optical Storage Media

## Blu-ray, CDR & DVD Media

With PRIMEON's high-grade 10x ULTRA SPEED **Blu-ray discs** storing large amounts of data is now a matter of just a few minutes. And with capacities of up to 50 GB on the dual layer discs there is plenty of space available for high-quality HD movies, precious digital memories and of course safe & reliable backups. By the way: All PRIMEON Blu-ray products are officially licensed by One-Blue!

Available as ultra-protect-disc, photo-on-disc & photo-on-disc ultragloss.

Price-performance winner at vergleich.org (PRIMEON BD-R DL 50GB, 2761311)

Looking for an reliable allrounder for your daily storage needs? Then take a look at PRIMEON's premium-quality **CDR media**! Whether documents, music or backups – no matter what you would like to store, the discs with 80 Min/700 MB capacity offer plenty of space. And thanks to 52x speed technology long waiting times are a thing of the past. Good to know: All PRIMEON CDR products are officially licensed by Philips!

Available as silver-protect-disc, photo-on-disc, photo-on-disc ultragloss & black-vinyl-disc.

Providing up to 8.5 GB of storage space on its double layer discs, PRIMEON's **DVD media** offers maximum reliability and flexibility for movie projects and important backups. Using high-speed 16x technology, discs can be recorded extremely fast and hassle-free – saving you a lot of time in your daily work flow. And of course: All PRIMEON DVD products are officially licensed by Philips!

Available as silver-protect-disc, photo-on-disc & photo-on-disc ultragloss.

## Surface Coatings

The special, scratch-resistant „silver-protect-disc“ surface prevents the disc from being damaged (e.g. by scratches) and can easily be labelled using a water-proof felt tip pen.

The superfine „photo-on-disc“ surface allows for professional designs when using an InkJet printer. Its mat premium coating combined with the full-size metallisation guarantees a brilliant and photo-realistic print result without any colour variation – and additionally an extremely short drying time.

While the outer ring of the surface has vinyl-like rills, the inner ring can be uniquely designed using an InkJet printer. The completely black bottom side makes the „black-vinyl-disc“ a real eye-catcher.

For maximum scratch resistance all PRIMEON Blu-ray products come with the unique „ultra-protect-disc“ surface coating. It minimizes data loss by accidental disc damage and can be labelled using a water-proof felt tip pen.

Thanks to the exclusive „photo-on-disc ultragloss“ surface the ink dries within seconds after printing, leaving nothing but a brilliant and absolutely water-proof and smear-resistant result. The shiny premium coating guarantees first class disc prints with breathtaking, unparalleled colours that will cause a sensation!

While the bottom side of the „black-vinyl-disc“ is completely black, the surface creates a real retro-feeling with its vinyl record coating including rills and nostalgic print (use a water-proof felt tip pen for labelling).

## Premium Optical Storage Media

Thank you for your interest in PRIMEON and our high-quality optical storage media products! PRIMEON offers a wide range of different Blu-ray, CDR and DVD media, all produced to the highest manufacturing standards, resulting in maximum data integrity and compatibility – for safe, reliable and convenient data storage.

Premium-grade PRIMEON disc media is the perfect solution for all your storage needs. No matter if you want to record high-quality HD movies with up to 50 GB on dual layer Blu-ray discs, perform continuous back-ups on DVD or archive precious memories, important documents and your favourite music on CD.

The various surface coatings (you can find more information on this topic on the previous page) offer maximum flexibility for all common applications. And of course all PRIMEON products are officially licensed with the respective licensees (e.g. One-Blue for all PRIMEON Blu-ray disc products).

Using latest technology and thanks to precise fabrication all PRIMEON single layer Blu-ray discs can be recorded with blazing fast 10x ULTRA SPEED. This way 25 GB of data can be written on disc in just about 10 minutes! The dual layer Blu-ray discs also offer ULTRA SPEED (8x) saving you valuable time in your daily work flow.

All this makes PRIMEON optical media the perfect choice for users with high demands on quality, reliability and data integrity. They are perfectly suitable for daily usage and offer outstanding compatibility with players and recorders. Get to know PRIMEON and allow yourself to be convinced of our premium optical media products!

### Outstanding quality & reliability

All PRIMEON products are exclusively produced with the focus on highest possible quality by the leading manufacturers of optical storage media

### Fast, faster... ULTRA SPEED

Thanks to 10x ULTRA SPEED technology with our single layer Blu-ray media, 25 GB of data can be recorded reliably in record-breaking 10 minutes

### Extensive selection of surface coatings

PRIMEON media is available with scratch resistant, inkjet printable (optional water resistant & glossy) and stylish retro vinyl surface

### Wide range of optical storage media products

PRIMEON offers a vast product range of premium-grade CDR, single and double layer DVD as well as recordable/rewritable Blu-ray disc media
